Why choose UE?

Health Management is at the intersection of business and healthcare, addressing the unique challenges of managing healthcare organizations, resources, and services. Whether you aspire to lead hospitals, healthcare facilities, insurance companies, or public health organizations, our comprehensive curriculum will prepare you to excel in a variety of roles within the healthcare industry.

In today's rapidly evolving healthcare landscape, effective management is more crucial than ever. Our innovative programme is designed to equip you with the knowledge, skills, and practical experience needed to succeed in this dynamic field. Healthcare requires specific management skills that differ from other industries. A health management degree provides knowledge in financial management, human resources, quality control, and operational efficiency.

Perspectives at the UE

The Bachelor's degree programme is based on providing an interdisciplinary and international management education for planning, development and controlling tasks in the healthcare sector. The degree programme aims to impart qualifications which, in the sense of entrepreneurial thinking and acting, ideally prepare students for the future requirements of a junior management position in the healthcare sector with leadership and management responsibility.

After studying Health Management, you will find career prospects as a Health Manager in the following areas: Health Manager, Healthcare Manager, Manager, Consultant.

All advantages at a glance

- Combination of theory and practical experience through the analysis of real case studies
- Integrated internship or semester abroad in the fifth semester
- Opportunities to establish business contacts during your studies
- Practice-oriented teaching by experts from science, business and the health sector
- Individual support in small learning groups
- Support with applications and job placements through our Career Development Centre
